LOMBARDINI MARINE - KDI2504TCR MP - MOTOR MARINO KDI2504TCR MP

KDI2504TCR MP

Categories: Inboard, Marine engines

Marine inboard engines series KDI were developed to grant very high performances and reliability. They perform high power rating and torque at low engine speed. This allows to reach high cruising speed at low engine speed with reduced noise and vibrations.

KDI1903TCR-MP and KDI2504TCR-MP are direct injection inboard diesel engines, naturally aspirated, turbo common rail, fresh water cooled via heat exchanger. Cast-iron engine block, one piece cast-iron cylinder head and gear drive command assure exceptional sturdiness.
